Subject: genetic engineering of food

---

From:  
Eric Moore  
106 Glenwild Av.  
Bloomingdale, N.J. 07403

President Clinton:

Americans should have the right to eat safe organic food. We should have the right not to eat foods that are genetically engineered. We can not exercise this choice if the foods are not labeled as such. Labels should tell us if the foods have been altered. The EPA should require such labeling. We should not be forced to eat foods that could be potentially harmful. Thank You.

Sincerely,

Eric Moore
